

Homework Assignment

We've created a [small coding homework assignment](#) to parse a log file and generate a report.

Please complete the assignment and share your code with us.

Submitting Your Homework

You can share your code and/or documentation with us in one of the two ways listed below. Please do not make your work publicly available to help make sure submissions by other people are original.

1. Make a private repository and share it with us:

| | Greg Oswald | Will Storey |
|-----------|---|---|
| GitHub | ● https://github.com/oschwald | ● https://github.com/horgh |
| BitBucket | ● https://bitbucket.org/oschwald/ | |
| GitLab | ● https://gitlab.com/oschwald | |

2. Send me an email with a zip or tar attachment

Thanks for working on this. We look forward to seeing your solution!
